## Solution

See the example.gif file or example.mp4 video for check the functionality. In this work I use the following external resources:

- Using data from <http://api.fixer.io/>
- Using MPAndroidChart for BarChars from <https://github.com/PhilJay/MPAndroidChart>

## Requirements

- Android 4.2+
- Android-Studio 1.4.1

## Import on Android Studio

- On Adroid-Studio, go to (File -> import) and select CurrencyConverter directory project.
- go to (Build -> Run'app')

## Instalation

- Copy CurrencyConverter.apk in your android device and make sure that you can install need **Unknown sources**:
  1. Open up **Settings** on your Android Device
  2. Slide down to the **System** section
  3. Tap on **Security**
  4. Check the box next to **Unknown sources**.
